

ABOUT ME

Hello! I'm Bulbul Ahammed Riad, a budding MERN stack developer on a mission to transform ideas into digital reality. My journey in web development began with a passion for problem-solving and a love for clean, efficient code. With a focus on the MERN stack, I'm excited about creating seamless, user-centric applications. Let's build something amazing together!

MY JOURNEY

My journey into the world of web development started with a curious mind and a determination to build things that matter. I dove into the intricacies of HTML, CSS, and JavaScript, laying a solid foundation for my coding endeavors. As my curiosity evolved, so did my skills, leading me to the dynamic MERN (MongoDB, Express.js, React, Node.js) stack.
